

PROFESSIONAL RESUME

AMIRUN HARRAZ BIN BUDIZAMAN

NAME : AMIRUN HARRAZ BIN BUDIZAMAN
POSITION : MECHANICAL ENGINEER
DATE OF BIRTH :
NATIONALITY : MALAYSIAN
MARITAL STATUS :
CONTACT ADDRESS : Batu Kawan, Penang
Tel : 018-2393250
EMAIL : harrazamirun@gmail.com

EXPERIENCE SUMMARY

Dedicated mechanical engineer registered with BEM, eager to apply my : Worked on process and equipment reliability within the oil and gas industry. • Contributed to system efficiency: with EEG medical devices, including setup, operation, and data collection for cognitive performance studies. Empty Fruit Bunch (EFB) Transport Mechanism (Oct 2022–Jan 2023) • Designed and analysed a chassis for transporting Empty Fruit Bunch (EFB) using SolidWorks, and conducted stress and deformation simulations in ANSYS to evaluate structural performance under load. Portable Flood Alarm System (July 2019) • Developed a flood alarm system using Arduino Uno and Arduino IDE, analysing disaster victims' challenges to design an effective alert solution.

ACADEMIC/TECHNICAL QUALIFICATIONS:

<u>Period/Duration</u>	<u>Description/Details</u>
Bachelor of Mechanical Engineering (Hons.) (Oct 2020 – Jul 2024)	Universiti Putra Malaysia (UPM) Cumulative GPA: 3.35 Relevant Coursework: Manufacturing System Design, Tooling Engineering, Engineering Design
Foundation in Engineering (Jul 2019 – Jun 2020)	
Universiti Teknologi MARA (UiTM)	Cumulative GPA: 3.57 Relevant Coursework: Physics, Mathematics, Chemistry, Programming
UNIVERSITY PROJECTS	
Cognitive Load And Work Performance Among Malaysia's Ageing Workforce Utilising Cognitive Ergonomic Technologies in Office Settings [FYP] (Dec 2023–July 2024)	• Analyzed cognitive load and work performance among Malaysia's ageing workforce using EEG data, and applied NLP and OCR technologies to assess performance with SPSS. • Gained hands-on

WORKING EXPERIENCE

Client: Enumerator (Part Time)

Duration: Apr 2025 – Present

- Designed mechanical parts: Executed piece part design using 3D CAD software and applying DFM principles for manufacturability.
- Prepared technical drawings & BOM: Created detailed drawings and Bills of Materials (BOM) for production.
- Translated customer requirements: Converted client requirements into technical design specifications and ensured feasibility.
- Managed design timelines: Planned, tracked, and coordinated project schedules across design phases.
- Implemented improvements: Identified and applied enhancements to product design and manufacturing processes.
- Collaborated cross-functionally: Worked closely with engineers and drafters to ensure smooth project execution and delivery.
- Prepared technical documentation: Compiled and organized documents for part registration, fabrication, and project reference.

Client: Product Support Engineer Intern (Internship)

Duration: Feb 2024 – Aug 2024

- Developed policies: Focused on reducing traffic-related fatalities and injuries.
- Collected data: Gathered information on Malaysian drivers in Wangsa Maju.
- Collaborated with authorities: Worked with local authorities to enhance road safety.
- Prepared reports: Compiled findings and made recommendations for road safety.

Duration: Jul 2023 – Oct 2023

- Maintained and serviced iCWD: Ensured optimal performance and reliability in alignment with operational standards.
- Conducted tests: Performed physical and electrical tests on products and materials.
- Calibrated equipment: Verified and calibrated equipment to meet client specifications and regulatory requirements.
- Gained hands-on experience: Worked on process and equipment reliability within the oil and gas industry.
- Contributed to system efficiency:

in design, problem-solving, and project management. Skilled in using CAD software such as AutoCAD and SolidWorks. Motivated to contribute to innovative projects and continuously grow within a dynamic organization. Seeking a role to solve practical challenges and develop professionally. . Enumerator (Part Time) The Bloomberg Philanthropies Initiative for Global Road Safety (BIGRS) (Feb 2024 – Aug 2024) • Developed policies: Focused on reducing traffic-related fatalities and injuries. • Collected data: Gathered information on Malaysian drivers in Wangsa Maju. • Collaborated with authorities: Worked with local authorities to enhance road safety. • Prepared reports: Compiled findings and made recommendations for road safety. Product Support Engineer Intern (Internship) MIT Technologies Sdn Bhd (Jul 2023 – Oct 2023) • Maintained and serviced iCWD: Ensured optimal performance and reliability in alignment with operational standards. • Conducted tests: Performed physical and electrical tests on products and materials. • Calibrated equipment: Verified and calibrated equipment to meet client specifications and regulatory requirements. • Gained hands-on • Software: AutoCAD, Solidworks, ANSYS, C++, Microsoft Office, SPSS(Intermediate); Catia, Python (Basic) • Language Spoken: Malay (Native); English (Fluent) • Technical: Welding, Milling, and Casting (Metal) INVOLVEMENTS • Participated in Site Safety Supervisor [SSS] Course | 2024 • Runner Up in SUKOL Dodgeball Tournament | 2022 • Participated in Catia V5 Software Short Course | 2022 • Silver Awards in ASiD Innovation & Creativity Day | 2019 Profesor Dr Wong Shaw Voon Academic Advisor Mechanical Engineering Department, Universiti Putra Malaysia, 43400 Serdang, Selangor 019-6655182 wongsv@upm.edu.my Dr Nurul Izzah Abd Rahman FYP Supervisor Mechanical Engineering Department, Universiti Putra Malaysia, 43400 Serdang, Selangor
