

PROFESSIONAL RESUME AMIRUN HARRAZ BIN BUDIZAMAN

NAME : AMIRUN HARRAZ BIN BUDIZAMAN
POSITION : MECHANICAL ENGINEER
DATE OF BIRTH :
NATIONALITY : MALAYSIAN
MARITAL STATUS :
CONTACT ADDRESS : Batu Kawan, Penang
Tel : 018 -2393250
EMAIL : harrazamirun@gmail.com

ACADEMIC/TECHNICAL QUALIFICATIONS:

<u>Period/Duration</u>	<u>Description/Details</u>
Bachelor of Mechanical Engineering (Hons.) (Oct 2020 – Jul 2024)	Universiti Putra Malaysia (UPM) Cumulative GPA: 3.35 Relevant Coursework : Manufacturing System Design , Tooling Engineering, Engineering Design
Foundation in Engineering (Jul 2019 – Jun 2020)	
Universiti Teknologi MARA (UiTM)	Cumulative GPA: 3.57 Relevant Coursework : Physics, Mathematics, Chemistry, Programming UNIVERSITY PROJECTS Cognitive Load And Work Performance Among Malaysia's Ageing Workforce Utilising Cognitive
Ergonomic Technologies in Office Settings [FYP] (Dec 2023 -July 2024)	• Analyzed cognitive load and work performance among Malaysia's ageing workforce using EEG data, and applied NLP and OCR technologies to assess performance with SPSS. • Gained hands-on

EXPERIENCE SUMMARY

Dedicated mechanical engineer registered with BEM, eager to apply my : Worked on process and equipment reliability within the oil and gas industry. • Contributed to system efficiency : Improved system performance and operational safety. • Collaborated with teams : Worked with cross-functional teams to support system improvements. • Optimized product functionality : Addressed client feedback to enhance product functionality. with EEG medical devices, including setup, operation, and data collection for cognitive performance studies . Empty Fruit Bunch (EFB) Transport Mechanism (Oct 2022 -Jan 2023) • Designed and analysed a chassis for transporting Empty Fruit Bunch (EFB) using SolidWorks, and conducted stress and deformation simulations in ANSYS to evaluate structural performance under load . Portable Flood Alarm System (July 2019) • Developed a flood alarm system using Arduino Uno and Arduino IDE, analysing disaster victims' challenges to design an effective alert solution.

WORKING EXPERIENCE

Client: Greatech Integration (M) Sdn. Bhd

Duration: Apr 2025 – Present

- Designed mechanical parts : Executed piece part design using 3D CAD software and applying DFM
- Prepared technical drawings & BOM : Created detailed drawings and Bills of Materials (BOM) for
- Translated customer requirements : Converted client requirements into technical design specifications
- Managed design timelines : Planned, tracked, and coordinated project schedules across design phases.
- Implemented improvements : Identified and applied enhancements to product design and manufacturing
- Collaborated cross-functionally : Worked closely with engineers and drafters to ensure smooth project
- Prepared technical documentation : Compiled and organized documents for part registration, fabrication,

in design , problem -solving , and project management . Skilled in using CAD software such as AutoCAD and SolidWorks . Motivated to contribute to innovative projects and continuously grow within a dynamic organization. Seeking a role to solve practical challenges and develop professionally. . Enumerator (Part Time) (Feb 2024 – Aug 2024) The Bloomberg Philanthropies Initiative for Global Road Safety (BIGRS) • Developed policies : Focused on reducing traffic -related fatalities and injuries. • Collected data : Gathered information on Malaysian drivers in Wangsa Maju. • Collaborated with authorities : Worked with local authorities to enhance road safety. • Prepared reports : Compiled findings and made recommendations for road safety. Product Support Engineer Intern (Internship) (Jul 2023 – Oct 2023) MIT Technologies Sdn Bhd • Maintained and serviced iCWD : Ensured optimal performance and reliability in alignment with operational standards. • Conducted tests : Performed physical and electrical tests on products and materials. • Calibrated equipment : Verified and calibrated equipment to meet client specifications and regulatory requirements. • Gained hands-on • Software : AutoCAD, Solidworks, ANSYS, C++, Microsoft Office, SPSS(Intermediate); Catia, Python (Basic) • Language Spoken: Malay (Native); English (Fluent) • Technical: Welding, Milling, and Casting (Metal) INVOLVEMENTS • Participated in Site Safety Supervisor [SSS] Course | 2024 • Runner Up in SUKOL Dodgeball Tournament | 2022 • Participated in Catia V5 Software Short Course | 2022 • Silver Awards in ASiD Innovation & Creativity Day | 2019 Profesor Dr Wong Shaw Voon Academic Advisor Mechanical Engineering Department, Universiti Putra Malaysia, 43400 Serdang, Selangor 019-6655182 wongsv@upm.edu.my Dr Nurul Izzah Abd Rahman FYP Supervisor Mechanical Engineering Department, Universiti Putra Malaysia, 43400 Serdang, Selangor 017-2997982 izzahrahman@upm.edu.my Mr Mohd Harbi Mohamed Internship Supervisor Service Delivery Manager, Operation Department, MIT Innovation Sdn Bhd, 57000 Bukit Jalil, K L 012-9016525 mohd.harbi@mit -ofs.com

PROFILE SUMMARY

Dedicated mechanical engineer registered with BEM, eager to apply my skills in design , problem -solving , and project management . Skilled in using CAD software such as AutoCAD and SolidWorks . Motivated to contribute to innovative projects and continuously grow within a dynamic organization. Seeking a role to solve practical challenges and develop professionally.

EXPERIENCE

Mechanical Design Engineer I (Apr 2025 – Present)

Greatech Integration (M) Sdn. Bhd

- Designed mechanical parts : Executed piece part design using 3D CAD software and applying DFM principles for manufacturability.
- Prepared technical drawings & BOM : Created detailed drawings and Bills of Materials (BOM) for production.
- Translated customer requirements : Converted client requirements into technical design specifications

and ensured feasibility.

- Managed design timelines : Planned, tracked, and coordinated project schedules across design phases.
- Implemented improvements : Identified and applied enhancements to product design and manufacturing processes.
- Collaborated cross-functionally : Worked closely with engineers and drafters to ensure smooth project execution and delivery.
- Prepared technical documentation : Compiled and organized documents for part registration, fabrication, and project reference.

Enumerator (Part Time) (Feb 2024 – Aug 2024)

The Bloomberg Philanthropies Initiative for Global Road Safety (BIGRS)

- Developed policies : Focused on reducing traffic-related fatalities and injuries.
- Collected data : Gathered information on Malaysian drivers in Wangsa Maju.
- Collaborated with authorities : Worked with local authorities to enhance road safety.
- Prepared reports : Compiled findings and made recommendations for road safety.

Product Support Engineer Intern (Internship) (Jul 2023 – Oct 2023)

MIT Technologies Sdn Bhd

- Maintained and serviced iCWD : Ensured optimal performance and reliability in alignment with operational standards.
- Conducted tests : Performed physical and electrical tests on products and materials.
- Calibrated equipment : Verified and calibrated equipment to meet client specifications and regulatory requirements.
- Gained hands-on experience : Worked on process and equipment reliability within the oil and gas industry.
- Contributed to system efficiency : Improved system performance and operational safety.
- Collaborated with teams : Worked with cross-functional teams to support system improvements.
- Optimized product functionality : Addressed client feedback to enhance product functionality.

EDUCATION

Bachelor of Mechanical Engineering (Hons.) (Oct 2020 – Jul 2024)

Universiti Putra Malaysia (UPM)

Cumulative GPA: 3.35

Relevant Coursework : Manufacturing System Design , Tooling Engineering, Engineering Design

Foundation in Engineering (Jul 2019 – Jun 2020)

Universiti Teknologi MARA (UiTM)

Cumulative GPA: 3.57

Relevant Coursework : Physics, Mathematics, Chemistry, Programming

UNIVERSITY PROJECTS

Cognitive Load And Work Performance Among Malaysia's Ageing Workforce Utilising Cognitive Ergonomic Technologies in Office Settings [FYP] (Dec 2023 -July 2024)

- Analyzed cognitive load and work performance among Malaysia's ageing workforce using EEG data, and applied NLP and OCR technologies to assess performance with SPSS.
- Gained hands-on experience with EEG medical devices, including setup, operation, and data collection for cognitive performance studies .

Empty Fruit Bunch (EFB) Transport Mechanism (Oct 2022 -Jan 2023)

- Designed and analysed a chassis for transporting Empty Fruit Bunch (EFB) using SolidWorks, and conducted stress and deformation simulations in ANSYS to evaluate structural performance under load .

Portable Flood Alarm System (July 2019)

- Developed a flood alarm system using Arduino Uno and Arduino IDE, analysing disaster victims' challenges to design an effective alert solution.

SKILLS

- Software : AutoCAD, Solidworks, ANSYS, C++, Microsoft Office, SPSS(Intermediate); Catia, Python (Basic)
- Language Spoken: Malay (Native); English (Fluent)
- Technical: Welding, Milling, and Casting (Metal)

INVOLVEMENTS

- Participated in Site Safety Supervisor [SSS] Course | 2024
- Runner Up in SUKOL Dodgeball Tournament | 2022
- Participated in Catia V5 Software Short Course | 2022
- Silver Awards in ASiD Innovation & Creativity Day | 2019
