

PROFESSIONAL RESUME AMIRUN HARRAZ BIN BUDIZAMAN KLSB_899

NAME : AMIRUN HARRAZ BIN BUDIZAMAN

POSITION :

DATE OF BIRTH :

NATIONALITY : MALAYSIAN

MARITAL STATUS :

CONTACT ADDRESS : Batu Kawan, Penang Phone: 018 -2393250

Tel: 018 -2393250

EMAIL : harrazamirun@gmail.com

ACADEMIC/TECHNICAL QUALIFICATIONS:

Bachelor of Mechanical Engineering (Hons.) (Oct 2020 – Jul 2024) Universiti Putra Malaysia (UPM) Cumulative GPA: 3.35
Relevant Coursework : Manufacturing System Design , Tooling Engineering, Engineering Design Foundation in Engineering
(Jul 2019 – Jun 2020) Universiti Teknologi MARA (UiTM) Cumulative GPA: 3.57 Relevant Coursework : Physics,
Mathematics, Chemistry, Programming UNIVERSITY PROJECTS Cognitive Load And Work Performance Among
Malaysia's Ageing Workforce Utilising Cognitive Ergonomic Technologies in Office Settings [FYP] (Dec 2023 -July 2024) •
Analyzed cognitive load and work performance among Malaysia's ageing workforce using EEG data, and applied NLP and
OCR technologies to assess performance with SPSS. • Gained hands-on

EXPERIENCE SUMMARY

Dedicated mechanical engineer registered with BEM, eager to apply my skills in design , problem -solving , and project management . Skilled in using CAD software such as AutoCAD and SolidWorks . Motivated to contribute to innovative projects and continuously grow within a dynamic organization. Seeking a role to solve practical challenges and develop professionally. **EXPERIENCE** Mechanical Design Engineer I (Apr 2025 – Present) Greatch Integration (M) Sdn. Bhd •
Designed mechanical parts : Executed piece part design using 3D CAD software and applying DFM principles for manufacturability. • Prepared technical drawings & BOM : Created detailed drawings and Bills of Materials (BOM) for production. • Translated customer requirements : Converted client requirements into technical design specifications and ensured feasibility. • Managed design timelines : Planned, tracked, and coordinated project schedules across design phases. • Implemented improvements : Identified and applied enhancements to product design and manufacturing processes. • Collaborated cross-functionally : Worked closely with engineers and drafters to ensure smooth project execution and delivery. • Prepared technical documentation : Compiled and organized documents for part registration, fabrication, and project reference. **Enumerator (Part Time) (Feb 2024 – Aug 2024)** The Bloomberg Philanthropies Initiative for Global Road Safety (BIGRS) • Developed policies : Focused on reducing traffic-related fatalities and injuries. • Collected data : Gathered information on Malaysian drivers in Wangsa Maju. • Collaborated with authorities : Worked with local authorities to enhance road safety. • Prepared reports : Compiled findings and made recommendations for road safety. **Product Support Engineer Intern (Internship) (Jul 2023 – Oct 2023)** MIT Technologies Sdn Bhd • Maintained and serviced iCWD : Ensured optimal performance and reliability in alignment with operational standards. • Conducted tests : Performed physical and electrical tests on products and materials. • Calibrated equipment : Verified and calibrated equipment to meet client specifications and regulatory requirements. • Gained hands-on experience : Worked on process and equipment reliability within the oil and gas industry. • Contributed to system efficiency : Improved system performance and operational safety. • Collaborated with teams : Worked with cross-functional teams to support system improvements. • Optimized product functionality : Addressed client feedback to enhance product functionality. **EDUCATION** Bachelor of Mechanical

Engineering (Hons.) (Oct 2020 – Jul 2024) Universiti Putra Malaysia (UPM) Cumulative GPA: 3.35 Relevant Coursework : Manufacturing System Design , Tooling Engineering, Engineering Design Foundation in Engineering (Jul 2019 – Jun 2020) Universiti Teknologi MARA (UiTM) Cumulative GPA: 3.57 Relevant Coursework : Physics, Mathematics, Chemistry, Programming UNIVERSITY PROJECTS Cognitive Load And Work Performance Among Malaysia's Ageing Workforce Utilising Cognitive Ergonomic Technologies in Office Settings [FYP] (Dec 2023 -July 2024) • Analyzed cognitive load and work performance among Malaysia's ageing workforce using EEG data, and applied NLP and OCR technologies to assess performance with SPSS. • Gained hands-on experience with EEG medical devices, including setup, operation, and data collection for cognitive performance studies . Empty Fruit Bunch (EFB) Transport Mechanism (Oct 2022 -Jan 2023) • Designed and analysed a chassis for transporting Empty Fruit Bunch (EFB) using SolidWorks, and conducted stress and deformation simulations in ANSYS to evaluate structural performance under load . Portable Flood Alarm System (July 2019) • Developed a flood alarm system using Arduino Uno and Arduino IDE, analysing disaster victims' challenges to design an effective alert solution. SKILLS • Software : AutoCAD, Solidworks, ANSYS, C++, Microsoft Office, SPSS(Intermediate); Catia, Python (Basic) • Language Spoken: Malay (Native); English (Fluent) • Technical: Welding, Milling, and Casting (Metal) INVOLVEMENTS • Participated in Site Safety Supervisor [SSS] Course | 2024 • Runner Up in SUKOL Dodgeball Tournament | 2022 • Participated in Catia V5 Software Short Course | 2022 • Silver Awards in ASiD Innovation & Creativity Day | 2019 REFERENCES Profesor Dr Wong Shaw Voon
