

PROFESSIONAL RESUME AMIRUN HARRAZ BIN BUDIZAMAN KLSB_907

NAME : AMIRUN HARRAZ BIN BUDIZAMAN

POSITION :

DATE OF BIRTH :

NATIONALITY : MALAYSIAN

MARITAL STATUS :

CONTACT ADDRESS : Batu Kawan, Penang Phone: 018 -2393250

Tel: 018 -2393250

EMAIL : harrazamirun@gmail.com

ACADEMIC/TECHNICAL QUALIFICATIONS:

Bachelor of Mechanical Engineering (Hons.) (Oct 2020 – Jul 2024)

Universiti Putra Malaysia (UPM)

Cumulative GPA: 3.35

Relevant Coursework : Manufacturing System Design , Tooling Engineering, Engineering Design

Foundation in Engineering (Jul 2019 – Jun 2020)

Universiti Teknologi MARA (UiTM)

Cumulative GPA: 3.57

Relevant Coursework : Physics, Mathematics, Chemistry, Programming

UNIVERSITY PROJECTS

Cognitive Load And Work Performance Among Malaysia's Ageing Workforce Utilising Cognitive

Ergonomic Technologies in Office Settings [FYP] (Dec 2023 -July 2024)

- Analyzed cognitive load and work performance among Malaysia's ageing workforce using EEG data, and applied NLP and OCR technologies to assess performance with SPSS.
- Gained hands-on

EXPERIENCE SUMMARY

Dedicated mechanical engineer registered with BEM, eager to apply my skills in design , problem -solving , and project management . Skilled in using CAD software such as AutoCAD and SolidWorks . Motivated to contribute to innovative projects and continuously grow within a dynamic organization. Seeking a role to solve practical challenges and develop professionally. **EXPERIENCE** Mechanical Design Engineer I (Apr 2025 – Present) Greatech Integration (M) Sdn. Bhd • Designed mechanical parts : Executed piece part design using 3D CAD software and applying DFM principles for manufacturability. • Prepared technical drawings & BOM : Created detailed drawings and Bills of Materials (BOM) for production. • Translated customer requirements : Converted client requirements into technical design specifications and ensured feasibility. • Managed design timelines : Planned, tracked, and coordinated project schedules across design phases. • Implemented improvements : Identified and applied enhancements to product design and manufacturing processes. • Collaborated cross-functionally : Worked closely with engineers and drafters to ensure smooth project execution and delivery. • Prepared technical documentation : Compiled and organized documents for part registration, fabrication, and project reference. Enumerator (Part Time) (Feb 2024 – Aug 2024) The Bloomberg Philanthropies Initiative for Global Road Safety (BIGRS) • Developed policies : Focused on reducing traffic -related fatalities and injuries. • Collected data : Gathered information on Malaysian drivers in Wangsa Maju. • Collaborated with authorities : Worked with local authorities to enhance road safety. • Prepared reports : Compiled findings and made recommendations for road safety.

Product Support Engineer Intern (Internship) (Jul 2023 – Oct 2023) MIT Technologies Sdn Bhd • Maintained and serviced iCWD : Ensured optimal performance and reliability in alignment with operational standards. • Conducted tests : Performed physical and electrical tests on products and materials. • Calibrated equipment : Verified and calibrated equipment to meet client specifications and regulatory requirements. • Gained hands-on experience : Worked on process and equipment reliability within the oil and gas industry. • Contributed to system efficiency : Improved system performance and operational safety. • Collaborated with teams : Worked with cross-functional teams to support system improvements. • Optimized product functionality : Addressed client feedback to enhance product functionality.
