

NAME : MOHD WALIYUDDIN BIN ABDUL KADIR

POSITION : SENIOR PIPING DESIGNER

DATE OF BIRTH : 16 AUGUST 1985

NATIONALITY : MALAYSIAN

MARITAL STATUS : MARRIED

CONTACT ADDRESS : UNIT 39-5 TO 39-8, BINJAI 8 PREMIUM SOHO,
NO. 2 LORONG BINJAI, 50450 KUALA LUMPUR
Tel: +603 2181 8078

ACADEMIC/TECHNICAL QUALIFICATIONS:

<u>Period/Duration</u>	<u>Description/Details</u>
2006 – 2007	Diploma in Mechanical Engineering Polytechnic Sultan Muadzam Shah
2004 – 2005	Certificate in mechanical Engineering Polytechnic Tanjong Malim

EXPERIENCE SUMMARY

Having substantial knowledge and experience of 16 years in Engineering Department, especially in Piping/PDMS Engineering and Design. Involve in Oil and Gas for offshore, onshore and ship building project.

Which involved in details design for standard document such as Pipe Support Standard & Piping Standard Details, responsible for preparation of Equipment layout, Piping GA studies, giving input for construction team, stress analysis team, check Isometric/Red line mark-up based on P&ID and Piping philosophy, Check Vendor Data and Data sheet from other discipline, MTO for Engineer, Design/reviewing/modelling/extract detail and fabrication drawing for issuance. Proficient in using piping software such as MDS, PDMS, E3D, CEASAR II and Auto CAD.

WORKING EXPERIENCE

Year : **November 2023 – Present**
Company : **NOV Process & Flow Technologies Malaysia Sdn. Bhd (Seconded by Kemuncak Lanai Sdn Bhd)**
Position : **Senior Piping Designer**

Project Involved:

HUGIN TEG – Aker BP ASA

Job Description:

- Prepare 3D model development execution planned
- Performed document sorting and validation
- Performed 3D Modelling as-built using Smart Plant 3D tools
- Prepared redline mark-up and validate as-built P&ID
- Reproduce Piping GA and Isometric drawings

Year : **March 2023 – October 2023**
Company : **Technip Energies (Seconded by Kemuncak Lanai Sdn Bhd)**
Position : **Senior E3D Piping Designer**

Project Involved:

1. TGM FEED Ph1 for Papua LNG
2. PROVISION OF FEED FOR PAPUA LNG DEVELOPMENT PROJECT - PHASE 2

Job Description:

- Prepared mark-up for drafter to do cutting plan drawing.
- Checking for the cutting plan piping drawing.
- E3D Pipe Support Modelling and preparation of pipe support drawing detail
- E3D Piping Modelling
- Piping MTO update and checking
- Perform Data consistency check

Year : **November 2021 – February 2023**
Company : **Petrofac Engineering Services (Seconded by Kemuncak Lanai)**
Position : **Senior E3D Piping Designer**

Project Involved:

Gas Storage Project for Sharjah National Oil Company

Job Description:

- Prepared mark-up for drafter to do cutting plan drawing.
 - Checking for the cutting plan piping drawing.
 - E3D Pipe Support Modelling and preparation of pipe support drawing detail
 - E3D Piping Modelling
 - Piping MTO update and checking
-

- Perform Data consistency check

Year : **September 2021 – November 2021**
Company : **Kemuncak Lanai Sdn Bhd**
Position : **Senior E3D Piping Designer**

Project Involved:

KASAWARI – (Structural Pipe Support & Shop Drawing Project) for MMHE

Job Description:

- Prepared mark-up for drafter to do cutting plan drawing.
- Checking for the cutting plan piping drawing.
- E3D Pipe Support Modelling and preparation of pipe support drawing detail
- E3D Piping Modelling
- Piping MTO update and checking
- Perform Data consistency check
- Isometric Drawing Production and Checking

Year : **May 2021 – August 2021**
Company : **Kemuncak Lanai Sdn. Bhd. (seconded to Synergy Oil and Gas)**
Position : **Senior E3D Piping Designer**

Project Involved:

Ruche Phase 1 Topside Production Facility (MOPU)

Scope of Work:

- E3D Pipe Support Modelling and preparation of pipe support drawing detail
- E3D Piping Modelling
- Piping MTO update and checking
- Perform Data consistency check
- Isometric Drawing Production and Checking

Year : **May 2020 – May 2021**
Company : **Kemuncak Lanai Sdn Bhd**
Position : **Senior Piping Designer**

Project Involved:

1. Provision of Engineering Services for 3D Model Development (Intelligent Model) for Petronas Chemical Ammonia Sdn Bhd (PCASB), as Senior Piping Designer (SP3D) (Jan 2021 – May 2021)
 - Prepare 3D model development execution planned
 - Performed document sorting and validation
 - Performed 3D Modelling as-built using Smart Plant 3D tools
 - Prepared redline mark-up and validate as-built P&ID
 - Reproduce Piping GA and Isometric drawings
2. HILTI Malaysia Sdn Bhd – LNG CANADA (May 2020 – December 2020)

- Perform schematic 3D modelling according to HILTI Integrated Floor System (IFC) standard and specification for sunken floor room
- Perform Modelling of the exotic shape as per HILTI Standard (PDMS)
- Liaise with Engineering team for structural analysis

Year : **January 2020 – April 2020**
Company : **Kemuncak Lanai Sdn Bhd (seconded to Ranhill Worley)**
Position : **Senior Piping Designer**

Project Involved:

1. Provision of Front-End Engineering Service (FEED) for Dulang East (DL-B) Tie-in, for Petronas Carigali Sdn Bhd.
 - Reposition Launcher and Receiver for new Tie-in from DL -E
 - Tie-in pipe routing and modelling based on site visit.
 - Design pipe routing in accordance with client specifications and requirement as per latest P & id.
 - Prepare and producing Piping General Arrangement (GA) and Pipe Support Location Detail (PSLP).
 - Liaise with all discipline to solve any design and process issue.
2. Provision of Front-End Engineering Service (FEED) for Dulang East (DL-E) - Wellhead Drilling Platform, for for Petronas Carigali Sdn Bhd.
 - Design pipe routing in accordance with client specifications and requirement as per latest P & id.
 - Design and Modelling Equipment such as Pressure vessel, Tote Tank and Launcher/Receiver.
 - Prepare and producing Piping General Arrangement (GA) and Pipe Support Location Detail (PSLP).
 - Liaise with all discipline to solve any design and process issue.
3. North Malay Basin Phase 3 Facilities Contract- Design Detail for WHB BRG Bergading, for HESS Exploration & Production Malaysia B.V
 - Design pipe routing in accordance with client specifications and requirement as per latest P & id.
 - Design and Modelling Pedestal Crane as per AFC drawing
 - Routing the safety volume for walk away follow by client requirement
 - Prepare Pipe support detail drawing for IFR and AFC
 - Prepare ISO drawing for IFR and AFC
 - Prepare and producing Piping General Arrangement (GA) and Pipe Support Location Detail (PSLP).
 - Liaise with all discipline to solve any design and process issue.

Year : **January 2017 – December 2019**
Company : **Boustead Heavy Industries Corporation**
Position : **Senior Executive - Lead Outfitting Production Engineer (AVEVA MARINE)**

Project Involved:

Engineering, Procurement, Construction, Installation, and Commissioning (EPCIC) Of Littoral Combat Ship. (LCS) for the Royal Malaysian Navy.

Job Description:

- Lead Production Drawing for Outfitting discipline.

- Monitor all designer and drafter to design and routing pipe for all service/system inside naval ship as per requirement and standard
- Liaise with functional/process engineer team to solve any discrepancy on their process or system.
- Involve review with Client (RMN) to make sure all system is in correct position
- Check against P & ID and IDD (requirement as per system) and PTP (piping specification)
- Monitor, prepare and issued all outfitting drawing extracted from PDMS model for IFC (issued for construction)
- Involve IDC (inter-discipline Check) with outfitting team if any clashes between piping to another section.
- Prepared all title block drawing for Outfitting production engineering as per requested by PMT approve by Client.

Year : **December 2016 – January 2017**
Company : **Petron Malaysia**
Position : **Senior Design Engineer (Freelance Contractor)**

Project Involved:

Port Dickson Terminal Piping and Instrument Diagram

Job Description:

- Site visit to trace process from tank to final process and make manual sketch for LPG (liquid process gas), diesel, kerosene, and petrol system
- Take on all info from operation Petron team to make sure the process and system are in correct flow.
- Incorporate all manual sketch to ACAD and prepare legend and abbreviation for P&ID
- Check against manual sketch and standard given by Petron team.
- Prepare P&ID drawing for review, approval and as built.

Year : **February 2015 – November 2016**
Company : **Sapura Kencana Petroleum Sdn Bhd**
Position : **PDMS Piping/Pipe Support Designer**

Project Involved:

1. Engineering, Procurement, Construction and Commissioning (EPCC) Of Tukau (TTJT-A) & Baronia (BNJT-K) PROJECT.

Client: PETRONAS Carigali Sdn. Bhd. (PCSB)

Duration: DEC-2015-NOV-2016

- Prepare and issued Isometric Drawing extracted from PDMS model for IFC (issued for construction)
- Checked Isometric Drawing based on Piping Material Class, P&ID, Process Line List, Pipe Support Standard (for span of support) and Instrument Hook-up
- Issued/check Pipe Support Detail drawing extracted from MDS based on Pipe Supports Standard Drawing and cross-checked with Isometric drawings.
- Revised Isometric and Pipe Support Detail Drawing based on requirement E.g. VDI, FI or SI, Post AFC and ETC.

-
- To highlight any discrepancy or new findings regarding P&ID, additional material to Engineer and any related to other department.
 - Prepare & responsible for red-line mark-up on P&ID, G.A, PSLP and Tie-in Index.
 - Person in Charge responsible on MSL (Master Ship-loose Drawing).
 - To determine the Exclusion Zone, load-out zone and lifting Zone with Structural Engineer for clearing pipe to be loosen.
 - Issuance of Final Tie-in Index, Erection Material List, and Master ship-loose List for PMT easy to pack.
 - Involve in MOM (minute of meeting) with Client in Offshore team for progress purposes.
 - Involve in As-Built Drawing
2. Engineering, Procurement, Construction and Commissioning (EPCC) Of Mumbai High South Redevelopment Phase-III (B18, B20 & B21) PROJECT.
Client: Oil and Gas Natural Corporation Ltd. (ONGC)
Duration: FEB-2015-NOV-2016
- Prepare and issued Isometric Drawing extracted from PDMS model for IFC (issued for construction)
 - Checked Isometric Drawing based on Piping Material Class, P&ID, Process Line List, Pipe Support Standard (for span of support) and Instrument Hook-up
 - Issued/check Pipe Support Detail drawing extracted from MDS based on Pipe Supports Standard Drawing and cross-checked with Isometric drawings.
 - Revised Isometric and Pipe Support Detail Drawing based on requirement E.g. VDI, FI or SI, Post AFC and ETC.
 - To highlight any discrepancy or new findings regarding P&ID, additional material to Engineer and any related to other department.
 - Prepare & responsible for red-line mark-up on P&ID, G.A, PSLP and Tie-in Index.
 - Person in Charge responsible on MSL (Master Ship-loose Drawing).
 - To determine the Exclusion Zone, load-out zone and lifting Zone with Structural Engineer for clearing pipe to loose.
 - Issuance of Final Tie-in Index, Erection Material List, and Master ship-loose List for PMT easy to packed.
 - Involve in MOM (minute of meeting) with Client in Offshore team for progress purposes.
 - Involve in As-Built Drawing
3. Procurement and Construction (PC) Of TOPSIDE AND JACKET FOR SK310 B15 DEVELOPMENT PROJECT.
Client: SapuraKencana ENERGY Sdn Bhd
Duration: MAY 2015 – NOV 2016
- Prepare and issued Isometric Drawing extracted from PDMS model for IFC(issued for construction)
 - Checked Isometric Drawing based on Piping Material Class, P&ID, Process Line List, Pipe Support Standard (for span of support) and Instrument Hook-up
 - Issued/check Pipe Support Detail drawing extracted from MDS based on Pipe Supports Standard Drawing and cross-checked with Isometric drawings.
 - Revised Isometric and Pipe Support Detail Drawing based on requirement E.g. VDI, FI or SI, Post AFC and ETC.
 - To highlight any discrepancy or new findings regarding P&ID, additional material to Engineer and any related to other department.
 - Prepare & responsible for red-line mark-up on P&ID, G.A, PSLP and Tie-in Index.
-

- Person in Charge responsible on MSL (Master Ship-loose Drawing).
- To determine the Exclusion Zone, load-out zone and lifting Zone with Structural Engineer for clearing pipe to loose.
- Issuance of Final Tie-in Index, Erection Material List, and Master ship-loose List for PMT easy to packed.
- Involve in MOM (minute of meeting) with Client in Offshore team for progress purposes.
- Involve in As-Built Drawing

4. WHEATSTONE PROJECT LNG PLANT

Position: Cost Control Piping Designer

Client: Chevron Australia PTY LTD

Duration: February 2015 – December 2015

- Prepare Excel worksheet format for Pipe Support and Piping to calculate Surface Area and weight
- Check Isometric, Pipe Support Detail and Pipe Support Standard which it the same with actual model
- Compare and update the surface Area and weight when revision come out
- Calculate all surface area piping and pipe support component
- Communicate with other department to solve the problem if any issue raise and going for meeting if have to
- Involve in as-built drawing

Year : **March 2014 – February 2015**
Company : **Malaysian Marine and Heavy Engineering (East)**
Position : **Senior PDMS Piping Designer**

Project Involved:

PROJECT: Engineering, Procurement, Construction and Commissioning (EPCIC) Of SK 316 Development Project.

Client: PETRONAS Carigali Sdn. Bhd. (PCSB)

Job Description:

- Prepare and issued Isometric Drawing extracted from PDMS model for IFC(issued for construction)
- Checked Isometric Drawing based on Piping Material Class, P&ID, Process Line List, Pipe Support Standard (for span of support) and Instrument Hook-up
- Issued/check Pipe Support Detail drawing extracted from MDS based on Pipe Supports Standard Drawing and cross-checked with Isometric drawings.
- Revised Isometric and Pipe Support Detail Drawing based on requirement E.g. VDI, FI or SI, Post AFC and ETC.
- To highlight any discrepancy or new findings regarding P&ID, additional material to Engineer and any related to other department.
- Prepare & responsible for red-line mark-up on P&ID, G.A, PSLP and Tie-in
- Index.
- Person in Charge responsible on MSL (Master Ship-loose Drawing).
- To determine the Exclusion Zone, load-out zone and lifting Zone with Structural Engineer for clearing pipe to loose.

- Issuance of Final Tie-in Index, Erection Material List, and Master ship-loose List for PMT easy to packed.
- Involve in MOM (minute of meeting) with Client in Offshore team for progress purposes.
- Involve in As-Built Drawing

Year : **May 2012 – March 2014**
Company : **JIS Analysis Sdn. Bhd.**
Position : **Senior Mechanical and Piping Designer/PDMS**

Project Involved:

1. Engineering, Procurement, Construction and Commissioning (EPCIC) Of South Acis Oil and Gas Development Project.
Client: MURPHY SARAWAK OIL CO. LTD
Duration: March 2013 – March 2014
 - Monitor all the Drafter and PDMS operator to Prepare all GRE Fabrication Drawing.
 - Prepared Pipe Support Standard for GRE pipe as per catalogue.
 - Issued and Checked Pipe Support Detail and Isometric Drawing for GRE pipe
 - Checked Routing pipe at the PDMS to report to Analysis Engineer for easy to Stress the Pipe.
 - Give input to Stress Engineer and Administration if any discrepancy related to Post AFC changes E.g. Material, new route and ETC.
 - Revised Isometric and Pipe Support Detail Drawing based on requirement E.g. VDI, FI or SI, Post AFC and ETC.
 - Involve in any meeting related to the technical issued for GRE purposes.
2. Engineering, Procurement, Construction and Commissioning (EPCC) Of Serendah Topside SK309/SK311
Client: MURPHY SARAWAK OIL CO. LTD
Duration: November 2012 - March 2013
 - Monitor all the Drafter and PDMS operator to Prepare all GRE Fabrication Drawing.
 - Prepared Pipe Support Standard for GRE pipe as per catalogue.
 - Issued and Checked Pipe Support Detail and Isometric Drawing for GRE pipe
 - Checked Routing pipe at the PDMS to report to Analysis Engineer for easy to Stress the Pipe.
 - Give input to Stress Engineer and Administration if any discrepancy related to Post AFC changes E.g., Material, new route and ETC.
 - Revised Isometric and Pipe Support Detail Drawing based on requirement E.g., VDI, FI or SI, Post AFC and ETC.
 - Involve in any meeting related to the technical issued for GRE purposes.
3. Engineering, Procurement, Construction and Commissioning (EPCC) Of Integrated Gas Development North Malay Basin Early Production System (KMA)
Client: Hess Exploration and Production Malaysia P.V
Duration: July 2012 – November 2012
 - Prepared Pipe Support Standard for GRE pipe as per catalogue.
 - Issued and Checked Pipe Support Detail and Isometric Drawing for GRE pipe
 - Checked Routing pipe at the PDMS to report to Analysis Engineer for easy to Stress the Pipe.

-
- Give input to Stress Engineer and Administration if any discrepancy related to Post AFC changes E.g., Material, new route and ETC.
 - Revised Isometric and Pipe Support Detail Drawing based on requirement E.g., VDI, FI or SI, Post AFC and ETC.
 - Involve in any meeting related to the technical issued for GRE purposes.
4. Engineering, Procurement, Construction and Commissioning (EPCC) Of Tapis EOR and Rejuvenation Project.
Client: EXXONMOBIL EXPLORATION AND PRODUCTION MALAYSIA INC.
Duration: May 2012 – December 2012
- Prepared Pipe Support Standard for GRE pipe as per catalogue.
 - Prepared and checked Ancillary Support after Stress pipe done by package.
 - Liaise with Client to solve site requirement to suit to site.
 - Give input to Stress Engineer if any discrepancy related to Post AFC changes E.g. Material, new route and ETC
5. Engineering, Procurement, Construction and Commissioning (EPCIC) Of KBB Northern Hub Project
Client: KBB
Duration: May 2012 – December 2013
- Prepared Pipe Support Standard for GRE pipe as per catalogue.
 - Issued and Checked Pipe Support Detail and Isometric Drawing for GRE pipe
 - PDMS for AFC and IFC drawing in AKER ENGINEERING MALAYSIA. Routing the pipe follow with P&ID and check the requirement against the checklist given by Aker Eng
 - Checked Routing pipe at the PDMS to report to Analysis Engineer for easy to
 - Stress the Pipe.
 - Give input to Stress Engineer and Administration if any discrepancy related to Post AFC changes E.g. Material, new route and ETC.
 - Revised Isometric and Pipe Support Detail Drawing based on requirement E.g. VDI, FI or SI, Post AFC and ETC.
 - Involve in any meeting related to the technical issued for GRE purposes.
6. FPSO KIKEH ACCOMODATION UPGRADE.
Position: Coordinator project
Client: MISC Berhad.
Consultant: Six Tee Engineering Group Pte. Ltd.
Manufacture: Amerstrand Engineering Sdn. Bhd.
Equipment: 8 units of Men Sleeper Cabin.
Duration: Oct 2012 – Dis 2012
- Planning the time schedule to be successful of the Project.
 - Prepare the organization chart and workflow of the project.
 - Prepared and General Arrangement and Piping Support Standard for
 - Fabrication purposes.
 - Prepare and checked Isometric and Pipe Support Detail for IFC (Issued for
 - Construction).
 - Prepare and responsibility for AS-BUILT Drawing.
7. South Acis Oil & Gas Development Project.
Position: Coordinator project
-

Client: Murphy Serawak Oil Co. Ltd.
Manufacture: Kumpulan Agresif Sdn. Bhd.
Equipment: 2 Units of Chemical Injection Skid.
Duration: Nov 2012 – December 2013

- Planning the time schedule to be successful of the Project.
- Prepare the organization chart and workflow of the project.
- Prepared the General Arrangement, Assembly Drawing and Name Plate
- Detail Fabrication purposes for Tank Skid.
- Prepare and checked General Arrangement, Assembly drawing and
- Fabrication Drawing for Structure Drawing.
- Prepare and responsibility for AS-BUILT Drawing

8. **Kebabangan Northern Hub Project.**

Position: Coordinator Project
Client: Kebabangan Petroleum Operating Company Sdn Bhd.
Manufacture: Borval Manufacturing Sdn Bhd.
Equipment: 19 Units of Sample Cooler.
Duration: July 2012 – Dis 2013.

- Planning the time schedule to be successful of the Project.
- Prepare the organization chart and workflow of the project.
- Prepare the Data sheet based on P&ID given and other input from Client.
- Monitor, design and prepare the General Arrangement, Assembly Detail and Name Plate Detail drawing for IFR (Issued for review) and AFC (Approved for construction) and IFC (Issued for Construction)
- Prepare and responsibility for AS-BUILT Drawing.

Year : **January 2008 – May 2012**
Company : **Sime Darby Engineering Sdn. Bhd.**
Position : **PDMS Piping Designer**

Project Involved:

1. **Engineering, Procurement, Construction and Commissioning (EPCC) Of B193 Process Platform**

Client: ONGC

Duration: Jan 2011 – May 2012

- Prepare and issued Isometric Drawing extracted from PDMS model for IFC (issued for construction)
- Checked Isometric Drawing based on Piping Material Class, P&ID, Process Line List, Pipe Support Standard (for span of support) and Instrument Hook-up
- Issued/check Pipe Support Detail drawing extracted from MDS based on Pipe Supports Standard Drawing and cross-checked with Isometric drawings.
- Revised Isometric and Pipe Support Detail Drawing based on requirement E.g., VDI, FI or SI, Post AFC and ETC.
- Involved in PDMS review activity.
- Involved with details design team for preparation of Pipe Support Standard, Piping Standard Details & Design Fabrication.
- Checking PDMS CAT & Spec for Piping Material against the piping Specification activity.
- Involve in MOM (minute of meeting) for progress purposes.

2. Procurement and Construction (PC) of F9JT-A Topside and KUJT-A Topside for Kumang Cluster Development Project (Phase 1)
Client: PETRONAS Carigali Sdn. Bhd.
Duration: March 2009 – Jul 2009
 - Prepare and issued Isometric Drawing extracted from PDMS model for IFC (issued for construction)
 - Checked Isometric Drawing based on Piping Material Class, P&ID, Process Line List, Pipe Support Standard (for span of support) and Instrument Hook-up
 - Issued/check Pipe Support Detail drawing extracted from MDS based on Pipe Supports Standard Drawing and cross-checked with Isometric drawings.
 - Revised Isometric and Pipe Support Detail Drawing based on requirement E.g VDI, FI or SI, Post AFC and ETC.
 - To highlight any discrepancy or new findings regarding P&ID, additional material to Engineer and any related to other department.
 - Prepare & responsible for red-line mark-up on P&ID, G.A, PSLP and Tie-in Index.
 - Person in Charge responsible on MSL (Master Ship-loose Drawing).
 - To determine the Exclusion Zone, load-out zone and lifting Zone with Structural Engineer for clearing pipe to loosen.
 - Issuance of Final Tie-in Index, Erection Material List, Master ship-loose List for PMT easy to pack.
 - Involve in MOM (minute of meeting) with Client in Offshore team for progress purposes.
 - Involve in As-Built Drawing
 3. Procurement and Construction (PC) of Melor (MLDP-A) & Laho (LHDP-A) Drilling Platform for Tangga Barat Cluster Development Project
Client: PETRONAS Carigali Sdn. Bhd
Duration: March 2009 – March 2010
 - Prepare and issued Isometric Drawing extracted from PDMS model for IFC (issued for construction)
 - Checked Isometric Drawing based on Piping Material Class, P&ID, Process Line List, Pipe Support Standard (for span of support) and Instrument Hook-up
 - Issued/check Pipe Support Detail drawing extracted from MDS based on Pipe Supports Standard Drawing and cross-checked with Isometric drawings.
 - Revised Isometric and Pipe Support Detail Drawing based on requirement E.g VDI, FI or SI, Post AFC etc.
 - To highlight any discrepancy or new findings regarding P&ID, additional material to Engineer and any related to other department.
 - Prepare & responsible for red-line mark-up on P&ID, G.A, PSLP and Tie-in Index.
 - Person in Charge responsible on MSL (Master Ship-loose Drawing).
 - To determine the Exclusion Zone, load-out zone and lifting Zone with Structural Engineer for clearing pipe to lose.
 - Issuance of Final Tie-in Index, Erection Material List, Master ship-loose List for PMT easy to be packed.
 - Involve in MOM (minute of meeting) with Client in Offshore team for progress purposes.
 - Involve in As-Built Drawing
 4. Procurement and Construction (PC) of Melor (MLDP-A) & Laho (LHDP-A) Drilling Platform for Tangga Barat Cluster Development Project
-

Client: PETRONAS Carigali Sdn. Bhd

Duration: March 2009 – March 2010

- Prepare and issued Isometric Drawing extracted from PDMS model for IFC (issued for construction)
- Checked Isometric Drawing based on Piping Material Class, P&ID, Process Line List, Pipe Support Standard (for span of support) and Instrument Hook-up
- Issued/check Pipe Support Detail drawing extracted from MDS based on Pipe Supports Standard Drawing and cross-checked with Isometric drawings.
- Revised Isometric and Pipe Support Detail Drawing based on requirement E.g VDI, FI or SI, Post AFC and ETC.
- To highlight any discrepancy or new findings regarding P&ID, additional material to Engineer and any related to other department.
- Prepare & responsible for red-line mark-up on P&ID, G.A, PSLP and Tie-in Index.
- Person in Charge responsible on MSL (Master Ship-loose Drawing).
- To determine the Exclusion Zone, load-out zone and lifting Zone with Structural Engineer for clearing pipe to lose.
- Issuance of Final Tie-in Index, Erection Material List, Master ship-loose List for PMT easy to be packed.
- Involve in MOM (minute of meeting) with Client in Offshore team for progress purposes.
- Involve in As-Built Drawing

5. Engineering, Procurement, Construction and Commissioning (EPCC) of Bunga Orkid-A Central Processing Platform (BO-A CPP) for Talisman Energy Malaysia Limited.

Client: Talisman Energy

Duration: March 2008 – March 2009

- Involve in Trainee Designer Programmed
- Prepare and issued Isometric Drawing extracted from PDMS model for IFC (issued for construction)
- Checked Isometric Drawing based on Piping Material Class, P&ID, Process Line List, Pipe Support Standard (for span of support) and Instrument Hook-up
- Issued/check Pipe Support Detail drawing extracted from MDS based on Pipe Supports Standard Drawing and cross-checked with Isometric drawings.
- Revised Isometric and Pipe Support Detail Drawing based on requirement E.g. VDI, FI or SI, Post AFC and ETC.
- To highlight any discrepancy or new findings regarding P&ID, additional material to Engineer and any related to other department.
- Prepare & responsible for red-line mark-up on P&ID, G.A, PSLP and Tie-in Index.
- Person in Charge responsible on MSL (Master Ship-loose Drawing).
- To determine the Exclusion Zone, load-out zone and lifting Zone with Structural Engineer for clearing pipe to lose.
- Issuance of Final Tie-in Index, Erection Material List, Master ship-loose List for PMT easy to be packed.
- Involve in MOM (minute of meeting) with Client in Offshore team for progress purposes.
- Involve in As-Built Drawing.

6. Engineering, Procurement, Construction and Commissioning (EPCC) of Sumandak Selatan (SUPG-B) Development Project.

Client: PETRONAS Carigali Sdn. Bhd

Duration: Jan 2008 – March 2008

- Incorporated Pipe Support Detail given By Designer.
- Filing the drawing follow by service given and instruction from Lead Engineer and Designer.
- Responsible for the Drawing Register and liaise with Designer if any misunderstanding with the drawing.

OTHERS (TRAININGS/SKILLS/etc.)

Training / Course Attended:

- Certificate B31.3 Process Piping from ASME.

Computer Skills:

- Microsoft Office Tools: Word, Excel, PowerPoint, Basic Access, Front Page
 - Engineering Applied: Computer Aided Design Software:
 - Plant Design Management System, (PDMS)
 - Everything 3D (E3D)
 - Multi-Disciplinary Support (MDS)
 - AutoCAD
 - CAESAR II
-
