AMIRUN HARRAZ BIN BUDIZAMAN

KLSB_877

NAME : AMIRUN HARRAZ BIN BUDIZAMAN
POSITION :
DATE OF BIRTH :
NATIONALITY : MALAYSIAN
MARITAL STATUS :
CONTACT ADDRESS : Batu Kawan, Penang Phone: 018
-2393250
Tel: 018 -2393250
Email: harrazamirun@gmail.com

ACADEMIC/TECHNICAL QUALIFICATIONS:

Bachelor of Mechanical Engineering (Hons.) (Oct 2020 – Jul 2024) Universiti Putra Malaysia (UPM) Cumulative GPA: 3.35
Relevant Coursework : Manufacturing System Design , Tooling Engineering, Engineering Design Foundation in Engineering
(Jul 2019 – Jun 2020) Universiti Teknologi MARA (UiTM) Cumulative GPA: 3.57 Relevant Coursework : Physics,
Mathematics, Chemistry, Programming UNIVERSITY PROJECTS Cognitive Load And Work Performance Among
Malaysia's Ageing Workforce Utilising Cognitive Ergonomic Technologies in Office Settings [FYP] (Dec 2023 -July 2024) ●
Analyzed cognitive load and work performance among Malaysia's ageing workforce using EEG data, and applied NLP and
OCR technologies to assess performance with SPSS. ● Gained hands -on

EXPERIENCE SUMMARY

- Dedicated mechanical engineer registered with BEM, eager to apply my skills in design , problem -solving , and project management .
- Skilled in using CAD software such as AutoCAD and SolidWorks .
- Motivated to contribute to innovative projects and continuously grow within a dynamic organization .
- Seeking a role to solve practical challenges and develop professionally.
- **EXPERIENCE Mechanical Design Engineer I** (Apr 2025 – Present) Greotech Integration (M) Sdn. Bhd ● Designed mechanical parts : Executed piece part design using 3D CAD software and applying DFM principles for manufacturability. ● Prepared technical drawings & BOM : Created detailed drawings and Bills of Materials (BOM) for production. ● Translated customer requirements : Converted client requirements into technical design specifications and ensured feasibility. ● Managed design timelines : Planned, tracked, and coordinated project schedules across design phases. ● Implemented improvements : Identified and applied enhancements to product design and manufacturing processes. ● Collaborated cross -functionally : Worked closely with engineers and drafters to ensure smooth project execution and delivery. ● Prepared technical documentation : Compiled and organized documents for part registration, fabrication, and project reference.
- **Enumerator (Part Time)** (Feb 2024 – Aug 2024) The Bloomberg Philanthropies Initiative for Global Road Safety (BIGRS) ● Developed policies : Focused on reducing traffic -related fatalities and injuries. ● Collected data : Gathered information on Malaysian drivers in Wangsa Maju. ● Collaborated with authorities : Worked with local authorities to enhance road safety. ● Prepared reports : Compiled findings and made recommendations for road safety.
- **Product Support Engineer Intern (Internship)** (Jul 2023 – Oct 2023) MIT Technologies Sdn Bhd ● Maintained and serviced iCWD : Ensured optimal performance and reliability in alignment with operational standards. ● Conducted tests : Performed physical and electrical tests on products and materials. ● Calibrated equipment : Verified and calibrated equipment to meet client specifications and regulatory requirements. ● Gained hands -on experience : Worked on process and equipment reliability within the oil and gas industry. ● Contributed to system efficiency : Improved system performance and operational safety. ● Collaborated with teams : Worked with cross -functional teams to support system improvements. ● Optimized product functionality : Addressed client feedback to enhance product functionality.

- EDUCATION Bachelor of Mechanical Engineering (Hons.) (Oct 2020 – Jul 2024) Universiti Putra Malaysia (UPM) Cumulative GPA: 3.35 Relevant Coursework : Manufacturing System Design , Tooling Engineering, Engineering Design Foundation in Engineering (Jul 2019 – Jun 2020) Universiti Teknologi MARA (UiTM) Cumulative GPA: 3.57 Relevant Coursework : Physics, Mathematics, Chemistry, Programming UNIVERSITY PROJECTS Cognitive Load And Work Performance Among Malaysia's Ageing Workforce Utilising Cognitive Ergonomic Technologies in Office Settings [FYP] (Dec 2023 -July 2024) ● Analyzed cognitive load and work performance among Malaysia's ageing workforce using EEG data, and applied NLP and OCR technologies to assess performance with SPSS. ● Gained hands -on experience with EEG medical devices, including setup, operation, and data collection for cognitive performance studies .
- Empty Fruit Bunch (EFB) Transport Mechanism (Oct 2022 -Jan 2023) ● Designed and analysed a chassis for transporting Empty Fruit Bunch (EFB) using SolidWorks, and conducted stress and deformation simulations in ANSYS to evaluate structural performance under load .
- Portable Flood Alarm System (July 2019) ● Developed a flood alarm system using Arduino Uno and Arduino IDE, analysing disaster victims' challenges to design an effective alert solution.
- SKILLS ● Software : AutoCAD, Solidworks, ANSYS, C++, Microsoft Office, SPSS(Intermediate); Catia, Python (Basic) ● Language Spoken: Malay (Native); English (Fluent) ● Technical: Welding, Milling, and Casting (Metal)
- INVOLVEMENTS ● Participated in Site Safety Supervisor [SSS] Course | 2024 ● Runner Up in SUKOL Dodgeball Tournament | 2022 ● Participated in Catia V5 Software Short Course | 2022 ● Silver Awards in ASiD Innovation & Creativity Day | 2019 REFERENCES Profesor Dr Wong Shaw Voon
