AMIRUN HARRAZ

KLSB_877

NAME : AMIRUN HARRAZ
POSITION :
DATE OF BIRTH :
NATIONALITY : MALAYSIAN
MARITAL STATUS : SINGLE
CONTACT ADDRESS : Batu Kawan, Penang Phone: 018-2393250
Tel: 018 -2393250
Email: harrazamirun@gmail.com

ACADEMIC/TECHNICAL QUALIFICATIONS:

Bachelor of Mechanical Engineering (Hons.) (Oct 2020 – Jul 2024) Universiti Putra Malaysia (UPM) Cumulative GPA: 3.35
Relevant Coursework : Manufacturing System Design , Tooling Engineering, Engineering Design Foundation in Engineering (Jul 2019 – Jun 2020) Universiti Teknologi MARA (UiTM) Cumulative GPA: 3.57 Relevant Coursework : Physics, Mathematics, Chemistry, Programming UNIVERSITY PROJECTS Cognitive Load And Work Performance Among Malaysia's Ageing Workforce Utilising Cognitive Ergonomic Technologies in Office Settings [FYP] (Dec 2023 -July 2024) • Analyzed cognitive load and work performance among Malaysia's ageing workforce using EEG data, and applied NLP and OCR technologies to assess performance with SPSS. • Gained hands-on

EXPERIENCE SUMMARY

- Dedicated mechanical engineer registered with BEM, eager to apply my skills in design , problem -solving , and project management . Skilled in using CAD software such as AutoCAD and SolidWorks . Motivated to contribute to innovative projects and continuously grow within a dynamic organization. Seeking a role to solve practical challenges and develop professionally.
- **EXPERIENCE**
- Mechanical Design Engineer I (Apr 2025 – Present)
- Greatech Integration (M) Sdn. Bhd
- Designed mechanical parts : Executed piece part design using 3D CAD software and applying DFM principles for manufacturability.
- Prepared technical drawings & BOM : Created detailed drawings and Bills of Materials (BOM) for production.
- Translated customer requirements : Converted client requirements into technical design specifications and ensured feasibility.
- Managed design timelines : Planned, tracked, and coordinated project schedules across design phases.
- Implemented improvements : Identified and applied enhancements to product design and manufacturing processes.
- Collaborated cross -functionally : Worked closely with engineers and drafters to ensure smooth project execution and delivery.
- Prepared technical documentation : Compiled and organized documents for part registration, fabrication, and project reference.
- Enumerator (Part Time) (Feb 2024 – Aug 2024)
- The Bloomberg Philanthropies Initiative for Global Road Safety (BIGRS)
- Developed policies : Focused on reducing traffic -related fatalities and injuries.
- Collected data : Gathered information on Malaysian drivers in Wangsa Maju.
- Collaborated with authorities : Worked with local authorities to enhance road safety.

- Prepared reports : Compiled findings and made recommendations for road safety.
- Product Support Engineer Intern (Internship) (Jul 2023 – Oct 2023)
- MIT Technologies Sdn Bhd
- Maintained and serviced iCWD : Ensured optimal performance and reliability in alignment with operational standards.
- Conducted tests : Performed physical and electrical tests on products and materials.
- Calibrated equipment : Verified and calibrated equipment to meet client specifications and regulatory requirements.
- Gained hands-on experience : Worked on process and equipment reliability within the oil and gas industry.
- Contributed to system efficiency : Improved system performance and operational safety.
- Collaborated with teams : Worked with cross-functional teams to support system improvements.
- Optimized product functionality : Addressed client feedback to enhance product functionality.
- EDUCATION
- Bachelor of Mechanical Engineering (Hons.) (Oct 2020 – Jul 2024)
- Universiti Putra Malaysia (UPM)
- Cumulative GPA: 3.35
- Relevant Coursework : Manufacturing System Design , Tooling Engineering, Engineering Design
- Foundation in Engineering (Jul 2019 – Jun 2020)
- Universiti Teknologi MARA (UiTM)
- Cumulative GPA: 3.57
- Relevant Coursework : Physics, Mathematics, Chemistry, Programming
- UNIVERSITY PROJECTS
- Cognitive Load And Work Performance Among Malaysia's Ageing Workforce Utilising Cognitive Ergonomic Technologies in Office Settings [FYP] (Dec 2023 -July 2024)
- Analyzed cognitive load and work performance among Malaysia's ageing workforce using EEG data, and applied NLP and OCR technologies to assess performance with SPSS.
- Gained hands-on experience with EEG medical devices, including setup, operation, and data collection for cognitive performance studies .
- Empty Fruit Bunch (EFB) Transport Mechanism (Oct 2022 -Jan 2023)
- Designed and analysed a chassis for transporting Empty Fruit Bunch (EFB) using SolidWorks, and conducted stress and deformation simulations in ANSYS to evaluate structural performance under load .
- Portable Flood Alarm System (July 2019)
- Developed a flood alarm system using Arduino Uno and Arduino IDE, analysing disaster victims' challenges to design an effective alert solution.
- SKILLS
- Software : AutoCAD, Solidworks, ANSYS, C++, Microsoft Office, SPSS(Intermediate); Catia, Python (Basic)
- Language Spoken: Malay (Native); English (Fluent)
- Technical: Welding, Milling, and Casting (Metal)
- INVOLVEMENTS
- Participated in Site Safety Supervisor [SSS] Course | 2024
- Runner Up in SUKOL Dodgeball Tournament | 2022
- Participated in Catia V5 Software Short Course | 2022
- Silver Awards in ASiD Innovation & Creativity Day | 2019
- REFERENCES
- Profesor Dr Wong Shaw Voon
