PROFILE SUMMARY

Dedicated **mechanical engineer** registered with BEM, eager to apply my skills in **design, problem-solving, and project management**. Skilled in using **CAD software** such as **AutoCAD** and **SolidWorks**. Motivated to contribute to innovative projects and continuously grow within a dynamic organization. Seeking a role to solve practical challenges and develop professionally.

EXPERIENCE

Mechanical Design Engineer I

(Apr 2025 – Present)

Greatech Integration (M) Sdn. Bhd

- **Designed mechanical parts:** Executed piece part design using 3D CAD software and applying DFM principles for manufacturability.
- **Prepared technical drawings & BOM:** Created detailed drawings and Bills of Materials (BOM) for production.
- **Translated customer requirements:** Converted client requirements into technical design specifications and ensured feasibility.
- **Managed design timelines:** Planned, tracked, and coordinated project schedules across design phases.
- **Implemented improvements:** Identified and applied enhancements to product design and manufacturing processes.
- **Collaborated cross-functionally:** Worked closely with engineers and drafters to ensure smooth project execution and delivery.
- **Prepared technical documentation:** Compiled and organized documents for part registration, fabrication, and project reference.

Enumerator (Part Time)

(Feb 2024 – Aug 2024)

The Bloomberg Philanthropies Initiative for Global Road Safety (BIGRS)

- **Developed policies:** Focused on reducing traffic-related fatalities and injuries.
- **Collected data:** Gathered information on Malaysian drivers in Wangsa Maju.
- **Collaborated with authorities:** Worked with local authorities to enhance road safety.
- **Prepared reports:** Compiled findings and made recommendations for road safety.

Product Support Engineer Intern (Internship)

(Jul 2023 – Oct 2023)

MIT Technologies Sdn Bhd

- **Maintained and serviced iCWD:** Ensured optimal performance and reliability in alignment with operational standards.
- **Conducted tests:** Performed physical and electrical tests on products and materials.
- **Calibrated equipment:** Verified and calibrated equipment to meet client specifications and regulatory requirements.
- **Gained hands-on experience:** Worked on process and equipment reliability within the oil and gas industry.
- **Contributed to system efficiency:** Improved system performance and operational safety.
- **Collaborated with teams:** Worked with cross-functional teams to support system improvements.
- **Optimized product functionality:** Addressed client feedback to enhance product functionality.

EDUCATION

Bachelor of Mechanical Engineering (Hons.)

(Oct 2020 – Jul 2024)

Universiti Putra Malaysia (UPM)

Cumulative GPA: 3.35

Relevant Coursework: Manufacturing System Design, Tooling Engineering, Engineering Design

Foundation in Engineering

(Jul 2019 – Jun 2020)

Universiti Teknologi MARA (UiTM)

Cumulative GPA: 3.57

Relevant Coursework: Physics, Mathematics, Chemistry, Programming

UNIVERSITY PROJECTS

Cognitive Load And Work Performance Among Malaysia's Ageing Workforce Utilising Cognitive

Ergonomic Technologies in Office Settings [FYP]

(Dec 2023-July 2024)

- Analyzed cognitive load and work performance among Malaysia's ageing workforce using EEG data, and applied NLP and OCR technologies to assess performance with SPSS.
- Gained hands-on experience with EEG medical devices, including setup, operation, and data collection for cognitive performance studies.

Empty Fruit Bunch (EFB) Transport Mechanism

(Oct 2022-Jan 2023)

- Designed and analysed a chassis for transporting Empty Fruit Bunch (EFB) using SolidWorks, and conducted stress and deformation simulations in ANSYS to evaluate structural performance under load.

Portable Flood Alarm System

(July 2019)

- Developed a flood alarm system using Arduino Uno and Arduino IDE, analysing disaster victims' challenges to design an effective alert solution.

SKILLS

- **Software:** AutoCAD, Solidworks, ANSYS, C++, Microsoft Office, SPSS(Intermediate); Catia, Python (Basic)
- **Language Spoken:** Malay (Native); English (Fluent)
- **Technical:** Welding, Milling, and Casting (Metal)

INVOLVEMENTS

- **Participated** in Site Safety Supervisor [SSS] Course | **2024**
- **Runner Up** in SUKOL Dodgeball Tournament | **2022**
- **Participated** in Catia V5 Software Short Course | **2022**
- **Silver Awards** in ASiD Innovation & Creativity Day | **2019**
